## COMPOSITE IBC CERTIFICATE OF COMPLIANCE

Date: 8/31/2026

Invoice#:

XXXXXX

CLEAN TANK TECHNOLOGIES CERTIFIES that the actions below were completed at 1203 University Pkwy, Yakima, WA 98901, for each IBC identified by unique tag number on the reverse. Applicable 49 CFR references follow each action.

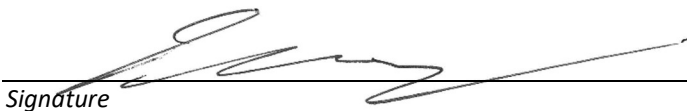

1. **INNER RECEPTACLE (BOTTLE) REMOVED FROM CAGE.** §180.352(b)(2)
2. **INTERNAL VISUAL INSPECTION PERFORMED.** §§180.352(b)(3), 180.352(d)(1)(iii)
  - ✓ The inner receptacle had no cracks, warpage, corrosion, or other defect that might render the IBC unsafe for transportation and appeared capable of withstanding applicable design qualification tests.
3. **LEAKPROOFNESS TEST PASSED.** §§180.352(b)(1), 178.813(b)-(d)
  - ✓ Vented closures were sealed. IBC inner receptacle (bottle) tested without the outer packaging (cage).
  - ✓ Inner receptacle restrained and submerged under water until the discharge valve is fully covered while pressurized to permit observation for air leakage.
  - ✓ Inner receptacle impact tested on all four side corners.
  - ✓ Test was carried out for a suitable length of time using air at a gauge pressure of not less than 20 kPa (2.9 psig).
4. **EXTERNAL VISUAL INSPECTION PERFORMED.** §§180.352(b)(2)(i)-(iii), 178.703
  - ✓ IBC required markings were present and legible, or were restored to the condition as required.
  - ✓ Service equipment was fully functional and free from damage that might cause failure. Missing, broken, or damaged parts were repaired or replaced.
  - ✓ IBC externally free from cracks, warpage, corrosion, or other damage that might render it unsafe for transportation and appeared capable of withstanding the applicable design qualification tests.
5. **RETEST/INSPECTION DATES MARKED; OWNER/LESSEE RECORD PROVIDED.** §§178.703(b), 180.352(f)-(g)  
*Note: The owner or lessee of the IBC must retain records of periodic retests, initial and periodic inspections performed on the IBC.*

**THIS CERTIFICATE RECORDS** the internal and external inspections, leakproofness test, and marking actions for the composite IBCs listed on the reverse under 49 CFR §§178.703, 178.813, and 180.352. For liquid-service composite IBCs, leakproofness testing and external inspection are required no more than 30 months (2.5 years) after manufacture or prior re-certification. Following repair, applicable tests and inspections must be completed before return to service. §180.352(b),(d).

**OWNER/LESSEE RECORDKEEPING.** Records for each IBC must identify the design type and packaging specification; test and inspection dates; test-facility name and address; person(s) performing the work; and methods and results. Records are to be kept with the container, and at each test location, until the tests are successfully repeated or for at least 2.5 years after the last test, whichever is longer, and made them available to DOT on request. §180.352(g).

**ENFORCEMENT NOTICE.** Knowing HMR violations may result in civil penalties under 49 CFR § 107.329; willful or reckless violations may result in criminal penalties under 49 CFR §107.333. Penalty amounts may be adjusted by law.

**CERTIFIED AS COMPLETED:**
